

CLEARDALE

EST GENETICS 1943

ON PROPERTY AND ONLINE SX FINE WOOL RAM AUCTION

29 Double Hill Run Road, RD12, Rakaia

Monday 27th January 2025, 1.00 p.m.

Last year was a toughie. I've written a bit more about what we are doing in our newsletter and what happens if we rub the crystal ball a bit. Hope is sometimes a good thing but is not a strategy!

For the first time since we have had a footrot breeding value, we have been unable to challenge the rams for footrot. As our footrot resistance improves this will become harder in a normal year, and the dry autumn/winter meant we could not get sufficient challenge to generate data to inform breeding values.

The values in the catalogue are therefore generated from parents and relatives.

The rams in the catalogue that had hogget mothers appear to have data, that when eyeballed, looks a bit off. Fleece weight especially, is lower than we would expect. We are checking to see if they have been correctly recorded in their own contemporary group and expect the numbers to move a little in the next MERINOSELECT run early/mid-January. The sires of hogget lambs also seem to have had their data dragged down so they may come up too. We will provide updated EBVs online after the updated run and on sheets at the sale.

There are a couple of other changes in the catalogue compared to last year. I have changed YWEC to PWEC. Our sheep data actually looks better on YWEC but we are starting to focus more on selection for earlier worm resistance so feel PWEC (post-weaning Egg Count) is a better measure to use. Conversely, we have included CS (condition score) because our data looks really good! And it's an important measure of resilience, doability and reproduction.

We have included hogget micron for the first time. I have resisted including this in the past because there are so many factors that affect micron e.g. being a twin out of a 2th tends to leave stronger progeny. I would encourage people to look at the breeding value as the best indicator for progeny micron. Finally, Sheep Genetics has reviewed its indexes and dropped the DP index so we have listed the closest equivalent, the SM (Sustainable Merino) index. The sale will be live streamed on Bidr, and we anticipate having videos of the rams out at least a week prior to the sale. Prior inspection can be arranged 22nd to 24th January if anyone can't make it to the sale.

We look forward to seeing you at the sale, and if you have any questions please don't hesitate to ask.

Terms and Conditions

1. This sale will be conducted in accordance with the Conditions of Sale as set down by the New Zealand Stock and Station Agents Association. These terms are available for review at the registration desk or can be viewed at nzssaa.co.nz.
2. All intending purchasers are required to register at the sales office prior to the sale.
3. A purchasing rebate of 6% of the purchase price excluding GST will be paid to non-participating livestock companies with approved credit facilities who introduce and/or accompany buyers to the sale.
4. Arrangements must be made with the auctioneer PRIOR TO SALE and settlement made on the buyer's behalf within 14 days.
5. G.S.T: All lots are sold on a GST exclusive basis.
6. Each lot shall become the property and responsibility of the purchaser on the fall of the hammer, including transport and insurance.
7. Purchasers are asked to complete booking and delivery instructions at the completion of the sale.
8. Although every care has been taken in ensuring the accuracy of this catalogue, no responsibility is accepted for any errors that may be included therein. The ASBVs in this catalogue are from the 21/11/2024 Sheep Genetics MERINOSELECT analysis.
9. Insurance: For all purchases, insurance can be arranged by the vendor
10. Guarantee: The entry of any ram in this catalogue constitutes a Guarantee of soundness that affects the rams's ability to breed and for fertility for three years. The purchase price will be refunded (without interest, expenses cost or damages) should the ram prove totally infertile (a vet certificate is required to validate infertility) and provided that the purchaser shall throughout the guarantee period assure that the ram has had proper care and attention and is maintained in good condition and health. The value of the ram shall decrease by 1/3 each year. The incapacity due to injury, neglect or to illness suffered or contracted after the sale is not covered by the guarantee.

Continued.

11. The vendor reserves the right to change the catalogue order.

12. Cleardale is an accredited Brucellosis free property

13. Delivery: Rams can be collected on the day or delivery can be arranged by consultation with the vendor.

14. Semen: Cleardale retain 50% semen rights on all rams sold and there is no commission on third parties.

15. Invoicing: We will invoice successful purchasers, to be paid by the 20th of the month following the sale.

16. Interest will be charged on overdue accounts.

Sale Day Information

Rams available: This sale will only include Cleardale SX Fine Wool Rams. Merino and Reserve SX Fine Wool Rams will be available for sale by private treaty after the sale.

Time: Inspection of sale animals will be available from 10:30am on the day of sale.

The sale will begin at 1pm, will be on property at 29 Double Hill Run Road, will be by open auction, and will be livestreamed on Bidr.

Catering: Lunch will be provided prior to the sale, and we welcome all sale attendees to join us for a drink afterwards.

Auctioneer: Madison Taylor from Hazlett

This sale will be hosted by bidr® (bidr.co.nz) as a HYBRID ON-FARM auction, with online bidding and a live-stream available for online purchasers.

All intending online purchasers must register with bidr® using an account held with one of the bidr® partner agencies in advance of the sale date.

The bidr® team is available to assist intending purchasers with signing up and registering – please call 0800 TO BIDR (0800 86 2437), or email enquiries@bidr.co.nz for assistance at any point.

Alternatively, contact your local bidr® representative:

How to interpret ASBVs

- Australian Sheep Breeding Values (ASBVs) allow you to compare the genetic differences between rams.
- Rams contribute half of a lamb's genetics. Rams have the largest impact on genetic progress, as they have more progeny throughout their lifetime.
- ASBVs are based around 0. It is important to compare ASBVs against current industry percentiles. .
- ASBVs are reported with an accuracy figure. The higher the accuracy, the more information there is contributing to the ASBV, and the closer it is to the true breeding value of the animal.
- ASBVs are reported with an age stage, shown as a letter at the beginning of a trait e.g. weaning weight is WWT

Rams with a more positive ASBV for eye muscle depth (**EMD**) produce lambs that have more muscle. A ram with an ASBV of 1mm will breed lambs with 0.5mm more eye muscle than a ram with an ASBV of 0mm.

Rams with lower fibre diameter (**FD**) ASBVs will produce progeny that have finer wool. A ram that has an ASBV of -2.0µm will produce progeny that are 0.5 microns finer than a ram with an ASBV of -1.0µm.

WT (kg)	EMD(mm)	FAT (mm)	CFW (%)	FD (µm)
9.5	1	1	24	-2.0
ACC. 70	ACC. 65	ACC. 63	ACC. 69	ACC. 70

Rams with a more positive ASBV for weight (**WT**) will produce lambs that grow faster and therefore reach target weights in a shorter period of time.

Rams with a positive ASBV for fat (**FAT**) will produce lambs that are fatter, at the same weight. This ram will produce lambs that are on average 0.5mm fatter at the GR site when compared with an ASBV of 0mm.

Rams with a higher clean fleece weight (**CFW**) will produce progeny that cut more wool. A ram with an ASBV of 24% will produce progeny that cut 4% more wool than the progeny of a ram with an ASBV of 16%.

ASBVs further explained

How to interpret ASBVs

ASBVs further explained

Rams with a more negative worm egg count (**WEC**) ASBV will produce progeny that are more resistant to worm burdens. A ram with a WEC ASBV of -40% will produce progeny that have 10% less worms compared to a ram with an ASBV of -20%.

Rams with a more negative ASBV for footrot (**FR**) will produce lambs that are less susceptible to footrot therefore a lower ASBV tends to be more desirable. A ram with an FR of -0.6 will produce progeny that have 0.3 score less footrot than a ram with an ASBV of 0.

SL (mm)	WR	WEC (%)	DAG	CS	FR	INDEX
20	0.2	-40	-0.6	0.6	-0.6	199.6
ACC. 70	ACC. 55	ACC. 70	ACC. 60	ACC. 49	ACC. 55	ACC. 56

Rams with higher staple length (**SL**) ASBVs will produce progeny that have longer wool. A ram that has an ASBV of 20 will produce progeny that are 5mm longer than a ram with an ASBV of 10

Rams with a more negative ASBV for dag (**LDAG**) will produce lambs with less dags therefore a lower ASBV tends to be more desirable. A ram with an LDAG of -0.6 will produce progeny that are 0.3 score less daggy than a ram with an ASBV of 0.

Rams with a higher weaning rate (**WR**) will produce daughters who wean more lambs per ewe joined. A ram with a WR of 0.2 will produce daughters who wean 0.05 more lambs per ewe joined than a ram with an ASBV of 0.1.

Rams with a more positive ASBV for Condition Score (**CS**) will produce progeny with more condition. A ram with a CS of 0.6 will produce progeny that are 0.3 score more condition than a ram with an ASBV of 0.

A selection index is an important tool to drive genetic improvement when there are a range of traits of economic or functional importance. Rams with higher indexes will produce lambs that are more suited to a particular production system.

ASBVs
